† Except Vanilla (✗)
^ Except Strawberry (✗)

Food for Special Medical Purposes, Use under medical supervision. For healthcare professional use only. ##Breast milk is best for babies. Professional advice should be followed before using an infant formula. Introducing partial bottle-feeding could negatively affect breast-feeding. Good maternal nutrition is important for breast feeding and reversing a decision not to breast feed may be difficult. Infant formula should be used as directed. Proper use of infant formula is important to the health of the infant. Social and financial implications should be considered when selecting a method of feeding.
